DETAILED ACTION

Examiner's Statement of Reasons for Allowance

Claims 1-10 are allowed over prior art.

The following is an examiner's statement of reasons for the indication of allowable claimed subject matter.

None of the prior art of record, either taken by itself or in any combination, would have anticipated or made obvious the invention of the present application at or before the time it was filed. The subject matter regarded as allowable by the examiner is found in claims 1, 8, 9 and 10, wherein "a cutting-off part cutting off the test signals input from the test terminal when the maintaining part maintains information indicating that secret data is stored at the memory location" in combination with other disclosed limitations.

The closest prior art of record Nakamura. et al., discloses (as indicated by the Applicant) " in the test mode, when hashed values are not matched to each other, data in the memory cannot be read out and protected. However, when the hashed values are successfully matched to each other, data in the memory can be read out. Thus, according to the teachings of Nakamura, et al., if a normal encryption key is stored in the memory, the data can be successfully read out".

Dependent claims 2-7 are also allowed over prior art of record by virtue of their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
